Being an

ALMANACK

for the Year 1693.

The Creation of the World, 5637.

It being

The [illegible] Leap-year:

[illegible] contained [illegible] Work;

As [illegible] Cor-
[illegible] of our Con-
guration of [illegible]

To [illegible] of the Almanack
of [illegible]

And [illegible]
and several [illegible] Judgments upon the four Quar-
ters of the year; [illegible] Almanacks; the first ever
in any Nation.

Calculated for the Meridian of *London*,
Whose Latitude is 51 degrees, 32 min.

By *MATTHEW HOBBS*,
Student in Physick and Astrology.

Non possumus omnia: Deus potens est comprecandus,
Ut prosperet, quæ cœperimus, succedant parva.

LONDON, Printed by *John Heptinstall*
for the Company of Stationers. 1693.

To the Buyers of yearly *Almanacks* and *Prognostications*.

Prefatio, sive admonitio pia & utilis.

THou, whose short span of life, as plain appears,
Hangs but upon the weft of some few years;
Which that *Arithmetician*, Pett of men
Casts up in his account threescore and ten;
How soon they will demolish, dig thy grave;
Thou mayst observe, thou seest what wings they have;
How with no pause the minutes post about,
Eating with silence, Lives and Leases out.

Incipe vivere, tactis nam tempora gressu
Diffugiunt, nullique fera consistunt in hora.

As here a date but yesterday renew'd,
No longer since, yet such a year concluded
In which the Diary or little cost
Is soon run out, and that small time lost
Which with 'twas purchas'd, if thou not intend
Thy thoughts, to make it thus far forth thy friend,
That every year thy *Almanack* thou buyest,
Th'art one year nearer to the year thou dyest:
And from that meditation so prepares
Thy self, that Death not seize thee unawares.
One year thus to another yielding room,
Hath fill'd many a *Sepulchre* and *Tomb*;
Fretted out *Brass* with Age, *Marble* with Rust,
Converted *Generations* into Dust.
From which collect, though ne'er so young thou be,
This may be *Doom's-day's* final year with thee;
And from that motive such a method borrow,
As thou shouldst live an age, or die to morrow.

Ultima semper expectanda dies.

THis Table shews the Interest of any sum of Money from 1 l. to 10000 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever; and note that for the greater exactness the peny is divided into 100 parts, so that 25 parts are a farthing, and 50 parts an half-peny, and 75 parts 3 farthings, &c. *Example.*

The Interest of 100 l. for six months one week and one day, is thus found by the Table.

A Race of glorious Monarchs here are ſhown,
From whence *William* and *Mary* claims their Throne.
The nobleſt Blood in *Europe* does combine
To conſtitute our Royal Soveraigns Line,
Under whoſe conduct may we long remain;
And may they then a heavenly Kingdom gain.

Would men be just, on terms we need not stand,
But live in Love and Peace throughout the land,
For People are with Lawyers to blame,
The Suit proves worse than losing of the Debt;
Hang'd hang it, refer the Case, and cease your fury,
Two Friends may decide as well as Judge and Jury.

Observations.

The Month begins with a ✶ of ♂ and ☿ from ♋ and ♍, and is immediatly succeeded with a ✶ of ♃ and ♂, and not long after there follows an Opposition of ♄ and ♂ from ♎ and ♈, very Remarkable Accidents and Actions will assuredly be near this time, unless God in mercy divert his Judgment impending; from all which let us pray, *Libera nos, domine*; we fear the Death of some Honourable Person near this time, and the loss of much Christian Blood. And in all probability some Plot or Design will be discovered.

Tempus omnia revelat.

Observations.

About this time we may look for great Contentions and Wranglings betwixt many Great Men. And there will be much Craft and Diffimulation, even where the greateſt Friendſhip is pretended. And Flattery will be ſure to creep into favour with Greatneſs, whilſt Plain Dealing is thought an Enemy of State and Honour. ——But *eſt Tempus quando aliquid, eſt tempus quando nihil, nullum autem eſt tempus in quo dicenda ſunt omnia.*

A *Conjunction*, is, when Planets are in 1 Sign and Degree.
A *Sextile*, is, when distant 2 Signs.
A *Quartile*, is, when distant 3 Signs.
A *Trine*, is, when they are distant 4 Signs.
An *Opposition*, is, when the Planets are distant 6 Signs.

The Government of the Moon *over the Body of* Man.

THe Princely *Ram*, clad in his golden Wool,
Looks back, admiring to behold the *Bull*
Against himself, who with a chearful Face
Calls to the *Twins*, to bid them mend their pace:
The *Crab* these follows, and the *Lion* than;
Next the *Celestial Maid* (not known by Man:)
Libra comes after, who (lest Time should fail)
Weighs out the Days and Nights in equal Scale;
And calls the *Scorpion* on, who in his Train
Bears a bright fulgent Star: At which (in vain)
The *Centaur* (with his String drawn to his Ear)
Arms his keen Shaft: The *Goat* doth next appear,
That's *Capricornus* call'd, who oft-times lours,
Because, to quench his Star, *Aquarius* pours
His Laver forth: Next after him be plac'd
Pisces, which of the Twelve Signs is the last.

The Explanation of the precedent TABLES of the Pleiades, or Seven Stars.

THE *Table* of the *Pleiades*, or *Seven Stars*, contains Ten Columns: The firſt, towards the left-hand expreſſes every Other Day of each Month, as 1, 3, 5, 7, 9, 11, &c. till you come to 31. The ſecond ſhews their Riſing in Hours and Minutes. The third, their Southing. The fourth, their Setting; as is plain by the Titles at the Top of each Column: and ſo in the fifth, ſixth, ſeventh and eighth Column, the ſame. And alſo the ninth and tenth is continued the Riſing, Southing and Setting of the Seven Stars, for every Other Day throughout the Year, (as is plain to the meaneſt Capacity.) Obſerve alſo, That the letter [A] denotes Afternoon; and [M] the Morning. As for *Example*:

Suppoſe I deſire to know the Riſing, Southing and Setting of the Seven Stars, on the Eleventh of *January*? I find 11 in the firſt Column, towards the left-hand, under the Title *Month-Days*: and againſt 11, and under *January*, I find that the Seven Stars Riſe 54 min. paſt 10 in the Morning, as the letter [M] denotes: and that they come to be South 15 min. paſt 7 in the Afternoon, as the letter [A] denotes: and Sets 26 min. paſt 3 in the Morning, as the letter [M] denotes. And alſo on the Eleventh of *February*, they Riſe at 52 min. paſt 8 in the Afternoon; and South at 8 min. paſt 5 in the Afternoon; and Set 28 min. paſt 1 in the Morning. And on the Eleventh of *March*, they Riſe 8 min. paſt 7 in the Morning; South 25 min. paſt 3 in the Afternoon; and, laſtly, Set 40 min. paſt 11 in the Afternoon, as the letter [A] denotes.

The Explanation of the following TABLE, ſhewing upon what Point the Moon is, when it is Full-Sea at any of theſe following Places.

IF you would know what time of the Day it is High-water at *London*, *Plymouth*, or any other Place; it is but adding the Hours and Minutes of the Moons Southing, to the Hours and Minutes againſt the Place, and the Summ is the time of High-water; ſubſtracting 12, if your Number exceed it, and the Remainder ſhews the Time.

A TABLE shewing upon what Point of the Equator the Moon makes a Full-Sea in any of the under-named Places, with the Hours and Minutes to be added to her coming to the South, for the Time thereof.

Astrological Judgments

For the Year MDCXCV.

By *MATTHEW HOBBS*,
Student in Physick and Astrology.

Assist, kind Stars. Your influence I woo:
Your Deeds now hatching, to my Pen indite:
See that fair Truths in every Sentence shine,
Till my Book's spangl'd, like your Seat divine.
'Tis your Concern: For if you False foreshow,
The Fault's not mine; 'twas you that told me so.
A Jove principium — Kind Heaven is Just,
Under those happy Smiles, we'll not distrust.
Lo, here the crowding Embassy's come o're,
Contending, at King William's *Feet, t'adore;*
They bow to Peace who once in Arms did trust,
Whose thirst was Blood, come now to lick the Dust.
Now fruitful Peace *o'er-flows, like* Nilus *Flood;*
And her loud Welcome drown the Noise of Blood:
The watchful Laws stand Guardians to these,
To Punish what would interrupt our Ease:
Peace supplies them by Industry, *and call*
On Heaven above for Blessings on us all:
A general Joy o'er-spreads the happy Isle;
Egypt's less happy in her seven-fold Nile.

Of the Winter-Quarter.

THE *Winter-Quarter* takes its Beginning *December* the 11th. 1694. 30 min. past 6 in the Morning: At which time we have about 9 deg. of *Sagittary* ascending, and 8 degrees of *Libra* in the Mid-heaven; and *Venus*, Lady thereof, is in the fifth House, in a Trine to *Jupiter*,

piter, who is posited in the House of *Religion*. The *Sun*, *Saturn*, *Mars*, and *Mercury*, are in a *Conjunction* in the Sign *Capricorn*, upon the Cusp of the second House. And, lastly, the *Moon* is in ♎; In the third, in a Sextile to ♄ and ♂, ☉ and ☿. The first thing that I shall take notice of, is, The *Moon*'s Separation and Application to so many Planets. Which intimates or fore-shews, That there will be Application for Peace to the King of *Great Britain*.

Here seems to be some Great Person, or Persons, standing up for Religion, and to uphold all good Laws and Customs. Here is great Consultation this Quarter, and for the Good of *England* in general.

The Diseases which will be most predominant this Quarter, are, Suffocations, the Gonorrhœa, Strangury, Quinzey, Sore Eyes, the *Noli me tangere*, and Flux of the Stomach, *&c.*

Of the Spring-Quarter,

WHich takes its Beginning when the Sun toucheth the first Point of *Aries*, which is this Year *March* the 9th 18 h. 18 min. P. *M.* At which time we have 4 deg. of ♐ culminating, and about 10 deg. of ♈ arising in the East Angle. ♄ is in the *Mid-heaven*, in his own Sgn ♑ ☿ and ♀ is in the Ascendant, in a Trine to ♅, who is placed in the sixth House; and the glorious Planet ☉ is just risen above our Horison, *&c.* The first thing that I shall take notice of, is, The harmonial Concord of the three Quarters; which are in △ to each other, and concurr together like the three Parts in *Musick*, which by their harmonious Sounds allure all Hearers thereof: so these three Quarters, the *Winter*, *Spring*, and the *Summer*, which are in a △ to each other (as I said before) shews that there will be many good *Men* joyn and concurr together for the Mediation of Peace. Some say, That if in any Annual Revolution of the World we find the *Moon* apply to the Sextile or Trine of the *Sun*, or *Jupiter*, as we find in this; they say, then there will be Application for Peace. The Indignation of the Heavens, which for a long time hath been rolling and turning over it, now seems

seems to be turned from us; and the favourable and benevolent Aspects promise the dawning of Peace and Settlement. Whilst a great part of the World are in Arms, and a considerable part thereof in Ashes, this our *Britain* (like the Centre) will stand unmov'd; if we don't, for want of a foreign Enemy to invade us, ransack and ruine our selves.

Mars in the twelfth, in a Southern Sign, may threaten the People Southward from *England*: they may expect to be much terrify'd and troubl'd by their Enemies; they may expect to hear the murdering Pieces about their ears, to see their Houses flaming over their heads, whilst the flame gives light to the bloody Victor, and merciless Soldier, to run away with their Goods. ☿ in a □ to ♄, and ☉ applying to the □ of ♄ also; these signifie very little to the Accommodations of the great Controversies in *Europe*. ☿ in □ to ♄ gives many Disturbances in the Counsels and Translations of the present Times; especially how to provide Money, or a Supply for the necessitous Occasions then coming on; which require large Summs to furnish all Conveniences for so grand Emergences, as probably are like to ensue in this succeeding Year in those Countries, subject to those Signs ♄ and ♀ are in.

The Heavens seem to promise well for our King: A King who is a Blessing to his People: A King not of a Mushroom Descent, but the Son of Nobles of a most Royal Stemm: A King of whom it may be truly said, That all Clemency, Goodness, and Sweetness of Temper, proper to a Prince, and advantagious to a People, are re-united and concentred in his Royal Person.

A miserable Sea of Disorder and Confusion was broke in upon us; our Lives, Liberties and Estates; and that which is most dear to all good Men, our very *Religion* (the best Reform'd throughout the World) were ready to be swallow'd up. But no sooner did his glorious Person appear amongst us, but those furious Waters did abate; and that black Cloud of Misery and Calamity from thence exhaled, and ready to fall upon us, was dispers'd and gone.

Exitus gaudia loquuntur, ingenia stupent ———

As *Mars* is placed in the twelfth House, *significat ingenia in Latrocinio, & hiis similibus*, &c. Men will set their Wits on

on work to steal and purloin, or shew great Cunning and Dexterity in such Pranks; the Pyrate to steal from the Merchant; all waiting Opportunities to do Mischief: some surprize a Town or Towns, Cities or strong Holds, by Treachery, under pretence of Friendship.

Strange Consults, Controversies in debate;
Under religious guise, Men violate
Covenants and Leagues, &c.

Et significat mœrorem & tristitiam venturam causâ magnorum animalium, tam illorum quæ equitantur, quam illorum quæ non equitantur. Many Countries shall suffer much Damage, Sorrow and Tribulation in their greater Cattel; not only by Diseases arising amongst them, but by Plunder, and forcibly taking them from their Owners; as well those which have been used in Service any way, as others which yet have not been trained up to any Labour, &c.

The Sicknesses of this Quarter being generally signified to be, Inflammations, Apoplexies, Burning-Fevers; and sudden Diseases, as Palpitations, Pleurisies, Convulsions, the Yellow-Jaundice, Qualms, Tremblings, and violent Diseases proceeding from Choler. Let Diseases be what they may be, we hope well of the Affairs of His Majesty of *England*: But sith the Manifestation of this Year's Actions doth more properly depend upon the Influence of the late Opposition of the two Superiors, *Saturn* and *Jupiter*, than upon the *Sun*'s Ingress into *Aries*, we will proceed to the *Sun*'s Entrance into *Cancer*.

Of the Summer-Quarter.

THis Quarter begins *June* the 11th. 35 min. past 8 in the Morning; at which time we have about 24 deg. of ♌ ascending, and 11 deg. of ♉ in the M. C. ♄ is in 12 deg. 15 min. of ♑, and in the fifth House; ♃ is in 23 deg. 21 min. of ♌, in the Ascendant; ♂ is in 26 deg. 38 min. of ♉, in the tenth House; ♀ is in 4 deg. 18 min.

of

of ☊, in the 17th, and ☽ is in 6 deg. of ♑, in the 11th, in ☌ with ☉. And, lastly, the ☽ is in 18 deg. of ♒, and in the third House; ☽ she separates from a ✶ of ♄, and hastens to a ✶ of ♅. The first thing that I shall take notice of, is, ♅ in the first House, in a □ to ☌, and ✶ to the ☽. This shews, That many worthy Persons that are Lovers of Truth, will mediate for Peace, but shall meet with many Oppositions from the Enemies of both; by whom (because you know the Men of this World are wicked), 'tis to be feared, all generous Endeavours tending to the Tranquillity and Happiness of this Nation, will be frustrated; and the zealous Labours for a Reconciliation of Differences, and bringing *Europe* to a more peaceful and settl'd Condition. About this time we may expect to hear of some vigorous Action; and though we may have the better, and in the main it may tend to the Good of the Protestant Religion; yet, 'tis probable, 'twill be a dear-bought Victory, purchas'd by much Fatigue, and the Expence of much Blood too.

We have in this Quarter an *Opposition* of the two Infortunes, *Saturn* and *Mars*; which happens on the 19th of *August*, about 21 min. past 3 in the Morning; at which time we have about 11 deg. of *Leo* ascending. This *Opposition* is made from the sixth and twelfth Houses of the Heavens, which signifies the loss of many Cattle, either by Thieves, or some sharp Distemper.

We further say, and do probably conjecture, (according to the Judgment of *Tycho*, and Mr. *Lilly*, and many other learned Men,) That after many sharp Wars had, and determined, or ended, that then the World shall find and enjoy Quietness, such as yet hath not been in any Age. —— *Pacificum quoddam & concors saeculum aliquandiu futurum*: A most peaceable and quiet Age, or World, shall be in all Parts of the Earth. —— *In quo politicarum administrationum & varietatis Religionum, tumultuariae confusiones transmutabuntur, & ad divinae voluntatis conformiorem Analogiam adaptabuntur*: When the Fulness of Time is come, and these fierce Wars are ended, and these many Conflicts determin'd, in all, or most Nations, then shall ensue a peaceful and harmonious World, in which the tumultuary Confusion in Politick and Religious Administrations shall be changed, or quite

quite altered, and be fitted to a more conform Analogy of the Divine Will of God, or Truth. ——— Not that I am of the Opinion of Mr. *Mason*, my late Country-man and Neighbour, who maintained *Judaicam Assertionem*, a *Jewish Fable, or Tradition*, (as one of the Antients calls it,) A *Tradition*, indeed, strangely amplify'd with many carnal and ridiculous Conceits, and stuff'd with Lies and Blasphemies, (as 'tis delivered by the Jews, in their *Talmud*, and Rabbinical Writings.) And certainly the *Millenaries* Opinion was originally derived from the *Jews*, concerning the Continuance of the World for 6000 Years, and a Sabbath of Rest then to ensue. And from them it was first received and maintained by certain Hereticks in the Christian Church; — of whom, the first that I read of, was *Cerinthus*, a Pestilential Heretick, who held and taught, That the World was made by Angels; That Christ was a mere Man, *ex conjugali mortali genitum*; and that after the Resurrection, he should reign over us here on Earth a Thousand Years.

After him, this Opinion was maintained by *Papias*, Bishop of *Hierapolis*, who was but a Man of small Judgment, as by his Books plainly appears; yet hereby gave he occasion of Errour to diverse Persons, who afterwards received and improved, illustrated and adorned the Notion of *Papias*, according to their own several Conceptions.

And it must needs be a great Prejudice and Discouragement to this Opinion, when the principal Authors of it were Jews and Hereticks, and those that did maintain it, did not agree amongst themselves about it.

——— *Cessat ergo Millenorum Fabula.* ———

The Diseases which will be most predominant this Quarter, are, Dropsies, Scurvey, Cramps, and Twitches; Aches, Pains, and Swellings; the Leprosie, Consumption, Cankers, Sciatica, and Palsey; and we fear some Pestilencial Distemper, which may puzzle some of the most able Physicians to find a Cure for, till some Thousands are sent to their long Homes.

Of

Of the Autumnal-Quarter.

THis Quarter takes its Beginning on the 12th. Day of *September*, 12 min. past 12 in the Morning; at which time we have *Mars* arising with 29 deg. of *Cancer*. The *Moon* hath just past the *Opposition* of *Sol*, and applies to a *Square* of *Saturn*. The ☉ and ♂ in *Angles*, may cause some sharp Duels and Murthers: We having a Fixed Sign ascending in the Scheme of the last Quarter, take not the least Notice of this; but yet there will be Wits playing of Tricks, and will have but little Reward for their Labour.

I shall only mention the Diseases which People will be most subject unto, and so finish the Four Quarters of the Year. The Diseases are, Dislocations, Madness, the *Noli me tangere*, Dropsies, Leprosies, Itch, Scabs, and all ill Humours proceeding from Melancholy.

Of the ECLIPSES that will happen in this Year, 1695.

THE Number of *Eclipses* that will be Visible to the Earth's Inhabitants, this Year, are Four. For, Twice will the Earth lose the resplendent Light of the *Sun*, by the Interposition of her Secundary Planet the *Moon* between the *Sun* and Her. And Twice also will the Secondary Planet the *Moon* be deprived of the *Sun*'s bright shining Lustre, by the Interposition of this *Globe* whereon we live between the *Sun* and Her. Nevertheless, it so falls out, that but Two of them will be Visible to those Parts of the Earth whereon we live; and the other Two will be Invisible to our *European* Part of the World.

The First will be a *Lunar Eclipse*, on the 18th. Day of *May*, about 14 min. past Ten in the Morning; and therefore will not be perceptible to us, because the *Moon* will then be under our Horizon. And such an Eclipse sendeth Thefts, Rapines, Destruction to Horses and Mules, the Pestilence, and many Evils.

The Second will be an *Eclipse* of the *Sun*, on *June* the First, 15 min. past Five in the Afternoon, in about 20 deg. and

49 min.

49 min. of the Celestial *Tythe*. This Eclipse falls in the eighth House, which is call'd *Domus Mortis*; and *Mercury* governs the following Angle, and the Eclipse; and therefore it will shew its Effects in the Weather, by Storms, and High Winds; and in the hot Countries, by Hurricanes: and this, I judge, because *Mercury* is very near the *Sun* and *Moon* at the time of the Eclipse. It also shews Piracies and Slaughters, and the Death of some Great Man, and various Mischiefs to many which are under *Gemini*.

The Third will be an *Eclipse* of the *Moon*, on the 10th. of *November*, 47 min. past Seven at Night. It may be seen in *England*, and many other Places, if the Air be clear. This *Eclipse* denotes the Death of many People; and some Great Lady in danger of losing her Life, &c.

The Last will be an *Eclipse* of the *Sun*, on the 24th. of *November*, 17 min. past Seven in the Morning, in 24 deg. 28 min. of *Sagittary*: It will be Invisible to us, because the Sun is not then risen above our Horizon. It shews grievous Dissentions, and deadly Feuds among Men; the Death of Cattle, and Prejudice to Horses and Armies, &c.

So much for the Judgment of *Eclipses*, and the whole Year.

The CONCLUSION.

READER, *Adieu! Whilst others Faces I shun,*
I freely own, my own I don't foreknow.
We ought we know, this Year may be our last,
Our subtil Fates advance in secret haste.
" *Friendly we live together; let's part so;*
" *But,* Courteous Reader, *Buy before you go.*
'Tis plain, all write what for their Eternity; so
May I (as well as others) for ought I know:
And sure I am, 'twill please some; the rest
May please themselves with what will please them best.
